GENERAL CATALOGUE

A NEW WAY TO CONNECT WITH CERAMIC TILES

ED. 2021

ARGENTA

COMPANY CONCEPT
CONCEPTO DE EMPRESA

FRIENDLYTILE CONCEPT. In little more than a decade, Argenta has managed to consolidate a young, dynamic team, that is continually being trained, which researches the current market, meeting its needs with technical and aesthetic ceramic solutions. It has more than 600 people working in 4 factories, which is an important source of income and welfare for the community. It is committed to developing a new generation of high added-value solutions, the result of research and the most advanced technology implemented by a highly-qualified technical team. Lastly, it has a close relationship with suppliers and customers, strategic alliances that allow them to join forces and perform integrated management of services, with resulting benefits for everyone, creating a business model based on trust, teamwork and mutual benefit.

FRIENDLYTILE COMO CONCEPTO DE EMPRESA. *En poco más de una década, Argenta ha logrado consolidar un equipo joven y dinámico en continua formación, que investiga el mercado actual, satisfaciendo con soluciones cerámicas técnicas y estéticas sus necesidades. Son más de 600 personas distribuidas en 4 factorías, una importante fuente de ingresos y bienestar para su comunidad. Su desarrollo de producto apuesta por una nueva generación de soluciones de alto valor añadido, fruto de la investigación y el uso de la más avanzada tecnología implementada por un equipo técnico cualificado. Y por último, una estrecha relación con proveedores y clientes, alianzas estratégicas que aúnan esfuerzos y permiten una gestión integral de las servicios, con la consecuente retribución de beneficios para todos, lo que conforma un modelo empresarial que apuesta por la confianza, el trabajo en equipo y el beneficio mutuo.*

LOOKING TO THE FUTURE

Argenta's management already has an ambitious expansion plan underway, aimed at increasing the capacity of its production plants, as well as implementing an international expansion plan, increasing its share of foreign markets and consolidating its leadership in the industry.

MIRANDO HACÍA EL FUTURO

Desde la dirección de Argenta, ya está en marcha un ambicioso plan de ampliación que se propone aumentar su capacidad de sus centros productivos así como la puesta en marcha de un plan de expansión internacional, aumentando su cuota en los mercados exteriores y consolidando su liderazgo en el sector.

1999
- Argenta is incorporated.
- Constitución de Argenta.

2000
- First Cerámicas Argenta logo.
- Primer Logotipo de Cerámicas Argenta.

2003
- The first factory of its own and its first production line (Factory 1).
- Primera factoría propia y primera línea de producción (Factoría 1).

2005
- A second production line is added.
- Se incorpora la segunda línea de producción.

2008
- The INKJET system is added to production.
- Se incorpora el sistema INKJET a la producción.

2010
- The Onda and Vilafamés factory opens.
- Apertura de la factoría en Onda y Vilafamés.

2013
- The Onda production plant is added (Factory 3).
- Se incorpora la Planta de producción de Onda (Factoría 3).

2014
- The Friendlytile concept is created and Argenta's logo is adapted.
- Nace el concepto Friendlytile y adaptación del Logotipo de Argenta.

2015
- The entire production of Factory 1 (Vall d'Alba) is moved over to porcelain.
- Toda la producción de la Factoría 1 (Vall d'Alba) se realiza en Porcelánico.

2017
- Production of ceramic laminate tile.
- Inauguration and Main Sponsorship of Villarreal C.F.'s Estadio de la Cerámica football stadium.
- Last adaptation of Argenta's logo.
- Producción de lámina cerámica.
- Inauguración y Patrocinio Principal del Estadio de la Cerámica del Villarreal C.F.
- Última adaptación del Logotipo de Argenta.

2018
- The entire production of white body is added to the Onda Plant (Factory 2).
- Se incorpora la Planta de Onda (Factoría 2), toda la producción de Pasta Blanca.

2019
- The covered logistic centre is added (CL2 - Onda).
- Se incorpora el Centro Logístico 2 cubierto de Onda (CL2).

2020
- The Showroom is completely updated and the Heart concept is created.
- Se actualiza por completo el Showroom y se crea el concepto Heart.

ECO-FRIENDLYTILE

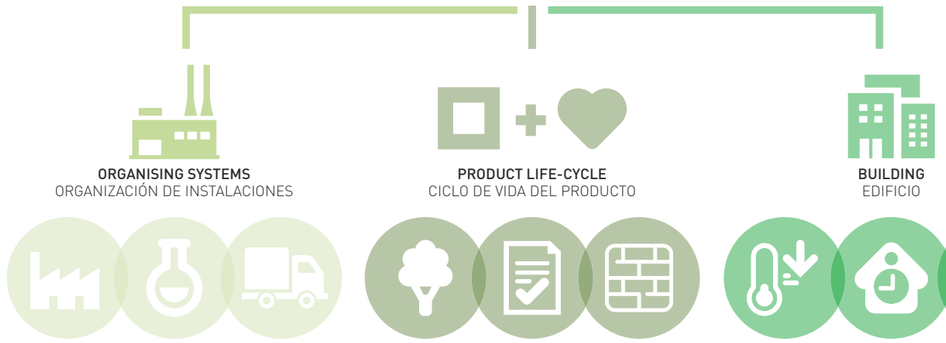
EN ES

At Argenta we have gone beyond a mere commitment to the environment and have taken action to ensure sustainability in construction and the circular economy.

We consider the entire value chain from extraction of raw materials, design and production of ceramics, and the building's construction, use and end of life. In its systems in particular, Argenta incorporates the necessary means in all of its production processes to care for our environment. Argenta implements action at both ORGANISATION level (systems) and PRODUCT level (life-cycle), taking the function at BUILDING level into consideration.

Argenta vamos más allá del compromiso medioambiental, hemos pasado a la acción por la sostenibilidad en la construcción y la economía circular.

Consideramos toda la cadena de valor desde la extracción de materias primas, el diseño y producción de la cerámica, construcción, uso y fin de vida del edificio, Argenta especialmente en nuestras instalaciones incorpora en todos sus procesos productivos los medios necesarios para el cuidado de nuestro entorno. En Argenta desplegamos actuaciones tanto a nivel de ORGANIZACIÓN (instalaciones) como a nivel de PRODUCTO (ciclo de vida) considerando la función en el nivel EDIFICIO



The Environmental Authority granted **Argenta** Integrated Environmental Authorisation (GA-2012/0475) in 2012. This confirms that **Argenta** achieves the aim of preventing, reducing and controlling atmospheric, water and soil pollution by establishing an integrated prevention and control system that prevents damage to the environment.

Since 2012 Argenta has implemented and been certified for an Environmental Quality System according to ISO 14001, which demonstrates its commitment to responsibility and enhanced environmental sustainability.

La Administración Ambiental concedió a **Argenta** la autorización Ambiental Integrada (GA-2012/0475) desde 2012, acredita que **Argenta** cumple con el objetivo de evitar, reducir y controlar la contaminación de la atmósfera, el agua y el suelo, mediante el establecimiento de un sistema de prevención y control integrados que evite el deterioro del entorno.

Argenta desde 2012 tenemos implantado y certificado un sistema de Gestión Ambiental de Calidad según ISO 14001 que demuestra su compromiso de responsabilidad y mejora sostenibilidad ambiental.

When sourcing raw materials, we take the environmental variable into consideration to reduce the impact, selecting the RECYCLED MATERIAL content based on the UNE-EN ISO 14021 standard: Environmental Labels and Environmental Declarations. **Argenta** can provide the TYPE II LABEL for the recycled content environmental declaration.

Argenta has made an Environmental Product Declaration-EPD, which has been verified and registered in the DAPconstrucción® Programme, TYPE III LABEL. The EPD includes different families of stoneware tile. Those covered by DAPcons® are in groups BIa and BIb and are made up of:

o BIb stoneware, 10 mm thick.
o BIa technical porcelain, 10.5 mm thick.
o BIa ecological porcelain, 10.8 mm thick.
o BIa enamelled porcelain, 11.5 mm thick.

Environmental Product Declaration in the DAPcons® UNE-EN ISO 14025 programme with registration number: DAPc002.018.

En el aprovisionamiento de materias primas tomamos en consideración la variable ambiental para reducir los impactos, seleccionando el contenido de MATERIAL RECICLADO: En base a la norma UNE-EN ISO 14021: Etiquetas Ecológicas y Declaraciones Medioambientales, **Argenta** les puede facilitar la ETIQUETA TIPO II de declaración ambiental de contenido en reciclado.

Argenta, ha realizado una Declaración Ambiental de Producto (DAP) en inglés (Evinromental Product Declaration-EPD que ha sido verificada y registrada en el Programa DAPconstrucción®. ETIQUETA TIPO III. La DAP incluye diferentes familias de gres porcelánico que incluye esta DAPcons® corresponden a los grupos BIa y BIb, y están formados por:

o BIb gres de 10 mm de espesor.
o BIa porcelánico técnico de espesor 10,5 mm.
o BIa porcelánico ecológico de espesor 10,8 mm.
o BIa porcelánico esmaltado de espesor 11,5 mm.

Declaración Ambiental de Producto de programa DAPcons® UNE-EN ISO 14025 con el registro: DAPc002.018.

https://s3-eu-west-1.amazonaws.com/emissionssl-ocs/dapc_docs/DAPcons_002_018_ARGENTA_EN.pdf

Within this scope, based on market demand and efficient parts of the building and the future value of constructed assets (including resources, energy, sustainability, the circular economy, etc.), **Argenta** is making solutions available to you in order to be able to reduce the environmental impact in areas ranging from construction to use and final demolition of the building. There are currently voluntary benchmarks for building sustainability certification. It will not be long until they are compulsory like energy ratings, as that has benefits for both society and the environment, but especially for those living in the home (lower consumption of water, electricity and resources, etc.).

Argenta strives day by day to respond to the ongoing challenges raised by building sustainability and presents the evidence in a transparent and structured manner in order to aid assessment by building sustainability certification bodies: LEED, BREEAM and VERDE.

En este ámbito de actuación, apoyando la demanda del mercado y partes eficientes del edificio y el valor de los activos construidos a futuro (que incluye recursos, energía, sostenibilidad, económica circular, etc.), **Argenta** pone a su disposición las soluciones para poder reducir impactos ambientales desde la construcción, hasta el uso y derribo final del edificio. Actualmente existen referenciales voluntarios de certificación sostenibilidad de edificios. No tardará en que sean obligatorios como la calificación energética, ya que esto genera beneficios tanto para la sociedad, el medio ambiente pero especialmente para los propios habitantes de la vivienda (menor consumo de agua, electricidad, recursos...).

En ese sentido **Argenta se esfuerza día a día en dar respuesta a los retos continuados que se plantean la sostenibilidad de la edificación y lo presenta las evidencias de forma transparente y estructurada para facilitar la evaluación de los certificadores de la sostenibilidad edificios LEED, BREEAM o VERDE.**

Argenta is continuing to progress with this assessment framework and includes useful information to enable performance of the Level(s) assessment at building level.

Level(s) is an open-source assessment framework produced by the European Commission based on existing regulations to provide a common EU focus to assess the environmental performance of buildings. The building sustainability certification schema in EU BREEAM, DGNB, VERDE, HQE and ITACA.

Argenta sigue los avances de este marco de evaluación e incluye la información útil que le permitirá realizar la evaluación Level(s) a nivel de edificio.

Level(s) es un marco de evaluación de código abierto elaborado por la Comisión Europea que se basa en las normas existentes para proporcionar un enfoque común de la UE para la evaluación del desempeño ambiental de los edificios. Los esquemas de certificación sostenibilidad edificios en EU BREEAM, DGNB, VERDE, HQE, ITACA, ... etc.

DAPcons®:

Environmental Product Declaration in the DAPcons® UNE-EN ISO 14025 programme with registration number: DAPc002.018:

Argenta has made an Environmental Product Declaration-EPD, which has been verified and registered in the DAPconstrucción® Programme. The EPD includes different product families of stoneware tiles produced at the Vall d'Alba and Villafamés production plant in Castellón. The products included in this DAPcons® are in groups BIa and BIb and are made up of:

BIb stoneware, 10 mm thick.
- BIa technical porcelain, 10.5 mm thick.
- BIa ecological porcelain, 10.8 mm thick.
- BIa enamelled porcelain, 11.5 mm thick.

This product is mainly used for flooring and/or wall and facade tiles both inside and outside. ReMa, a company with extensive experience in sustainability and environmental assessments of organisations and products, handled the Life-Cycle Assessment (LCA), which was verified by ITeC. The category is DAPcons® 2.018, based on Product Category Rules PCR 2 for ceramic tiles. Certification is valid until August 2022.

This EPD has been carried out "from cradle to grave", i.e. analysing the product's environmental impact taking into account all stages: extraction of raw materials, manufacture, construction, use in the building and end of life.

The DAPconstrucción® Programme was set up in 2008 and specialises in construction products with the aim of bringing together manufacturing companies that wish to further their analysis of the environmental impact of their products and commit themselves to environmental improvement.

For more information about DAPcons® visit:
www.csostenible.net/index.php/es/sistema_dapc

DAPcons®:

Declaración Ambiental de Producto de programa DAPcons® UNE-EN ISO 14025 con el registro: DAPc002.018:

Argenta, ha realizado una Declaración Ambiental de Producto (DAP) en inglés (Evinromental Product Declaration-EPD que ha sido verificada y registrada en el Programa DAPconstrucción®. La DAP incluye diferentes familias de gres porcelánico producido en la planta de producción de Vall d'Alba y Villafamés, en Castellón. Los productos que incluye esta DAPcons® corresponden a los grupos BIa y BIb, y están formados por:

BIb gres de 10 mm de espesor.
- *BIa porcelánico técnico de espesor 10,5 mm.*
- *BIa porcelánico ecológico de espesor 10,8 mm.*
- *BIa porcelánico esmaltado de espesor 11,5 mm.*

Este producto se utiliza principalmente como pavimentación de suelos y/o revestimiento de paredes y fachadas, tanto de interior como de exterior. La empresa ReMa, con amplia experiencia en sostenibilidad y evaluación ambiental de organización y producto, ha sido la encargada de realizar el Análisis de Ciclo de Vida (ACV), siendo verificada por ITeC. Se trata de la DAPcons® 002.018, basada en las Reglas de Categoría de Producto RCP 002 para productos de revestimiento cerámico, con una validez hasta agosto del año 2022.

Ésta DAP se ha realizado "de la cuna a la tumba", es decir, se analizan los impactos medioambientales del producto teniendo en cuenta todas las etapas: extracción materias primas fabricación, construcción, uso en el edificio y final de vida.

El Programa DAPconstrucción® se creó el año 2008 y está especializado en productos de la construcción con el objetivo de aglutinar empresas fabricantes que desean avanzar en el análisis de los impactos medioambientales de sus productos y comprometerse con la mejora ambiental.

Para más información acerca de DAPcons® visite:
www.csostenible.net/index.php/es/sistema_dapc

ECO-FRIENDLYTILE

EN ES

LEED® Certification:

LEED®, Leader in Energy Efficiency and Sustainable Design, is an assessment system and international standard developed by the U.S. Green Building Council to encourage the development of buildings based on sustainable and high-efficiency criteria. LEED makes a building sustainable through recognition of its performance in five key areas of human health and the environment: sustainable site, water saving, energy efficiency, selection of materials and environmental quality.

Benefits of certification:
1. Savings and emissions reduction.
2. Improvements in comfort, health and productivity.

Certificación LEED®:

LEED® Líder en Eficiencia Energética y Diseño sostenible, sistema de evaluación y estándar internacional desarrollado por el U.S. Green Building Council para fomentar el desarrollo de edificaciones basadas en criterios sostenibles y de alta eficiencia. LEED proporciona la sostenibilidad del edificio mediante el reconocimiento de su rendimiento en cinco áreas clave de la salud humana y el medio ambiente: emplazamiento sostenible, ahorro de agua, eficiencia energética, selección de materiales y calidad medioambiental.

Beneficios de la certificación:
1. Ahorro y reducción de emisiones.
2. Mejoras en el confort, salud y la productividad.

VERDE certification:

A methodology for environmental assessment and certification of buildings.

In recent years, green building concepts have been developed to include new concepts and nuances. Due to different factors such as climate change and resource scarcity, there is greater awareness of environmental problems among both the public and designers. This set of elements has led to study of buildings going beyond mere "good practices", taking account of problems involving resource saving, comfort and selection of materials according to environmental criterial.

The assessment system is based on a performance method in accordance with the philosophy in the Technical Building Code and European directives. It is founded on the principles of bioarchitecture and that the building has to be constructed in an environmentally friendly way, in keeping with its surroundings and with high levels of comfort and quality of life for users.

Certificación VERDE:

Metodología para la evaluación y certificación ecológica de edificios.

En los últimos años los conceptos de edificación verde han ido desarrollándose incorporando nuevos conceptos y matices. Debido a diferentes factores, como el cambio climático y la escasez de recursos, se ha producido una mayor concienciación tanto de los ciudadanos como de los proyectistas en los problemas medioambientales. El conjunto de estos elementos ha llevado al estudio del edificio más allá de las sencillas "buenas prácticas", tomando en cuentas problemas de ahorro de los recursos, el confort y la selección de los materiales según criterios medioambientales.

El sistema de evaluación se basa sobre un método prestacional de acuerdo con la filosofía del Código Técnico de la Edificación y las Directivas Europeas. En la base están los principios de la bio-arquitectura y que el edificio tiene que ser construido respetando el medio ambiente, compatible con el entorno y con altos niveles de confort y de calidad de vida para los usuarios.

BREEAM® Internacional:

BREEAM® (Building Research Establishment Environmental Assessment Methodology) is a global method for assessment and certification of the technical sustainability of buildings.

It encourages more sustainable construction, which translates into higher profitability for those who build, operate and/or maintain the building; a reduction in its environmental impact; and greater comfort and health for those who live in, work in or use the building.

It assesses impact in 10 categories (Management, Health & Wellbeing, Energy, Transport, Water, Materials, Waste, Land Use and Ecology, Pollution and Innovation) and gives a final score after applying an environmental weighting factor that takes account of the relative importance of each impact area. It comprises the various stages of design, structure and use of buildings and provides assessment and certification schema based on building type and use.

BREEAM® Internacional:

BREEAM® (Building Research Establishment Environmental Assessment Methodology) es un método de evaluación y certificación de la sostenibilidad de la edificación técnicamente a nivel mundial.

Favorece una construcción más sostenible que se traduce en una mayor rentabilidad para quien construye, opera y/o mantiene el edificio; la reducción de su impacto en el medio ambiente; y un mayor confort y salud para quien vive, trabaja o utiliza el edificio.

Evalúa impactos en 10 categorías (Gestión, Salud y Bienestar, Energía, Transporte, Agua, Materiales, Residuos, Uso ecológico del suelo, Contaminación, Innovación) y otorga una puntuación final tras aplicar un factor de ponderación ambiental que tiene en cuenta la importancia relativa de cada área de impacto. Comprende las distintas fases de diseño, construcción y uso de los edificios y dispone de esquemas de evaluación y certificación en función de la tipología y uso del edificio.

INTEGRATED ENVIROMENTAL PLAN
PLAN MEDIOAMBIENTAL INTEGRADO

EN ES

With the aim of establishing the company as an environmentaly-committed reference within the ceramic industry, all of Argenta's production processes incorporate the measures necessary to protect our surroundings. The integrated environmental authorisation granted to Argenta is aimed at preventing, reducing and controling the pollution of the atmosphere, water and land through the establishment of an integrated prevention and control system that impedes the deterioration of our natural environment.

By implementing an Environmental Management System in accordance with the ISO 14001 international standard, Argenta Cerámica S.L. has positioned itself as a socially responsible company.

Our goal is to manage resources and waste as little as possible and reduce the negative environmental impact of our industrial business.

Commitments:
- Continuous improvement
- Preventing pollution
- Legal compliance

Environmental Benefits:
- It reduces the business's environmental impact.
- It manages resources and waste as little as possible from both a quantitative and a qualitative point of view, resulting in less hazardous raw materials and products.

Compliance with legislation:
Argenta Cerámica holds an Integrated Enviromental Authorization, being the third company in its sector to obtain such an authorization. The Environmental Authorization certification evaluates the global impact that our facilities has the surrounding water, air and land.

Best available techniques:
Our production facilities are equipped with the most advanced environmental technologies and our company philosophy is centered on R+D+i. The plant's anti-pollution devices are subjected to rigorous controls by certified verification agencies in order to ensure that they comply with the established emission limits.

Con el fin de afianzarse como grupo cerámico referente en el compromiso medioambiental, Argenta incorpora en todos sus procesos productivos los medios necesarios para el cuidado de nuestro entorno. La Autorización Ambiental Integrada concedida a Argenta, tiene por objetivo evitar, reducir y controlar la contaminación de la atmósfera, el agua y el suelo, mediante el establecimiento de un sistema de prevención y control integrados que evite el deterioro del entorno.

Gracias a la implantación de un Sistema de Gestión Ambiental según la norma internacional ISO 14001, Argenta Cerámica S.L, se posiciona como empresa socialmente responsable.

Nuestro objetivo es optimizar la gestión de recursos y residuos, y reducir los impactos ambientales negativos derivados de la actividad industrial.

Compromisos:
- Mejora continua
- Prevención de la contaminación
- Cumplimiento de la legislación

Beneficios Ambientales:
- Reduce los impactos ambientales de la actividad.
- Optimiza la gestión de recursos y residuos, tanto desde un punto de vista cuantitativo como cualitativo, incidiendo en una menor peligrosidad de las materias primas y productos.

Cumplimiento de la legislación:
Argenta Cerámica posee la Autorización Ambiental Integrada. Fue la tercera empresa del sector cerámico en obtenerla. En la Autorización Ambiental se evalúan los impactos de nuestra instalación a las aguas, al aire y al suelo con un enfoque integrador.

Mejores técnicas disponibles:
Las instalaciones de nuestra planta productiva están equipadas con las tecnologías ambientales más avanzadas y apostamos por I+D+i como filosofía de empresa. Los dispositivos anti-contaminación son sometidos a controles rigurosos por verificadores acreditados garantizando que cumplen con los valores límites de emisión.

GA-2012 / 0475

QUALITY SYSTEM INTEGRATED
SISTEMA DE CALIDAD INTEGRADO

EN ES

The ISO 9001 global standard lays down the requirements for putting a proper Quality Management System in place. It is used as the point of reference for certifying such management systems in any organisation, in particular in industry.

An ISO 9001 certificate shows that each step in production, from selecting raw materials to storage of the finished product, is completely reproducible and controlled. The complex process of producing ceramics is divided into separate stages and analysed, supervised and improved continually to achieve the high levels of excellence that Argenta Cerámica SL guarantees its customers.

Quality, reliability and safety are fundamental parameters that can only be improved through an efficient, strict and tightly controlled industrial process that makes it possible to achieve and constantly strengthen the quality standards that Argenta Cerámica SL offers.

Argenta Cerámica SL is seeking to achieve the following objectives through the ISO 9001 standard:

- Improving our products and services, while fully complying with the legislation in force and local specifications in order to meet our customers' needs and expectations.
- Offering our customers a support and service guarantee both before and after the sale, to ensure they are properly informed about how to correctly use and install the products.
- Adding value to our workers by stimulating their skills and creativity through adequate training and involving them in the objectives set.
- Achieving ongoing improvement of our production process through correct and adequate management of technical resources.
- Planning monitoring of our plants, tools and equipment to ensure they are used adequately and maintaining high levels of efficiency and reliability in product checks and measurements.
- Building a mutually beneficial relationship between our company and suppliers in order to achieve shared business objectives.
- Continually improving business management processes to take the best strategic decisions and manage to prevent problems effectively.

La norma mundial ISO 9001 establece los requisitos para establecer un correcto Sistema de Gestión de calidad y es el punto de referencia para las certificaciones de dichos Sistemas de gestión de cualquier organización, y en concreto de las empresas con actividad industrial.

La certificación ISO 9001 demuestra que cada paso de la producción, desde la selección de las materias primas hasta el almacenamiento del producto terminado, es totalmente reproducible y está bajo control. El complejo proceso de la producción de cerámica se divide en fases individuales y se analiza, se supervisa y se mejora continuamente con el fin de alcanzar los altos niveles de excelencia que Argenta Cerámica SL garantiza a sus clientes.

La calidad, la fiabilidad y la seguridad son parámetros fundamentales que únicamente pueden mejorarse mediante un proceso industrial eficiente, riguroso y muy controlado que permite alcanzar y fortalecer constantemente los estándares de calidad que nos ofrece Argenta Cerámica SL.

Con la norma ISO 9001, en Argenta Cerámica SL nos proponemos alcanzar los siguientes objetivos:

- Mejorar nuestros productos y servicios en el pleno cumplimiento de la legislación vigente y las especificaciones locales con el fin de satisfacer las necesidades y cumplir las expectativas de nuestros clientes.
- Ofrecerles a nuestros clientes una garantía de soporte y servicio, tanto antes como después de la compra, para asegurarnos de que están debidamente informados respecto a la correcta utilización e instalación de los productos.
- Aportar valor a nuestros trabajadores estimulando sus habilidades y creatividad mediante una formación adecuada involucrándoles con los objetivos fijados.
- Lograr una mejora continua de nuestro proceso de producción mediante la gestión correcta y adecuada de nuestros recursos técnicos.
- Programar el control de nuestras plantas, herramientas y equipos para garantizar que se utilizan de forma adecuada y mantener altos niveles de eficiencia y fiabilidad de las mediciones y comprobaciones del producto.
- Crear una relación de beneficio mutuo entre nuestra empresa y proveedores con el fin de alcanzar objetivos de negocio comunes.
- Mejorar continuamente los procesos de gestión de negocios para tomar las mejores decisiones estratégicas y lograr prevenir los problemas de forma efectiva.

FITTING RECOMMENDATIONS
RECOMENDACIONES DE INSTALACIÓN

EN

Installing ceramic tiles involves a process in which you must select the right fitting technique based on all the factors involved in the system. Below are some general recommendations to take into account to correctly fit ceramic tiles.

You should always read the manufacturer's recommendations and the data sheets for all of the products and materials you use. It is important to have qualified professional tilers carry out the work to ensure each project is performed with the necessary quality and best end result in terms of technical features and appearance. Please contact Argenta Cerámica S.L.

1.- SELECTING THE TILE AND DESIGNING THE TILING SYSTEM:
Select the right type of tile for the project based on the technical and functional requirements of the surface to be tiled. The manufacturer states what each tile is intended to be used for based on its characteristics. Take the following into account when selecting the tile: mechanical requirements, slip resistance, frost resistance, chemical resistance and dimensional characteristics.

It is important to choose the right tile based on different factors related to its use and purpose: whether it is to be used on floors or walls, indoors or outdoors, for residential or public use, as well as any other additional requirements or adverse environmental conditions.

After you have selected the right tile for each project, examine the base it will be fitted to and select the adhesive and grout. All of these criteria together will determine the most appropriate tiling technique for each project.

2.- MARKING OUT THE AREA:
After general cleaning but before you stack the materials and organise the work area, you first need to mark out the area to be tiled. Marking out includes the following stages:
- Check all of the measurements of the area to be tiled: mark out the levels, check whether the walls are plumb and the surfaces are flat, check for any hollow areas and mark out the joints.
- Depending on how you marked out the joints and the dimensions, you should have a layout that meets the following objectives: no narrow strips and/or small points (diagonally laid tiles) and as little cutting of tiles as possible.
- Inspection, cleaning and protection of pre-existing structural joints. Marking out the movement joints and planning the work to make those joints.

ES

La instalación y puesta en obra de un revestimiento cerámico es un proceso en el que se debe seleccionar la técnica de colocación en función de todos los factores que intervienen en el sistema. A continuación se exponen algunas recomendaciones generales a tener en cuenta para la correcta colocación de un revestimiento con baldosas cerámicas.

En todos los casos en necesario leer las recomendaciones del fabricante y las fichas técnicas de todos los productos y materiales utilizados. Es importante contar con profesionales alicatadores soladores cualificados para la ejecución de los trabajos en cada proyecto con calidad y asegurar la optimización de las prestaciones técnicas y estéticas en el resultado final. En caso de duda técnicas, consultar con Argenta Cerámica S.L.

1.- SELECCIÓN Y DISEÑO DEL SISTEMA CERÁMICO:
Atendiendo a las exigencias técnicas y funcionales del revestimiento, se procederá a la selección del tipo de baldosas cerámicas apropiadas para cada proyecto. El fabricante indica el uso previsto de cada baldosa en función de sus características y para su selección tendremos en cuenta: las exigencias mecánicas, resistencia al resbalamiento, resistencia a la helada, resistencia química y características dimensionales.

Es importante la correcta prescripción de la baldosa en función de deferentes factores relacionados con su uso y destino: si será utilizada en pavimento o revestimiento, en interior o en exterior, para uso residencial o público, así como otras exigencias adicionales o condiciones ambientales adversas.

Tras la selección de la baldosa adecuada para cada proyecto, se procederá al diagnóstico del soporte de colocación y a la selección de los materiales de agarre y rejuntado. En función de todos estos criterios se utilizará la técnica de colocación de las baldosas cerámicas más apropiada para cada proyecto.

2.- REPLANTEO DEL ESPACIO:
Después de efectuar la limpieza general, pero antes de realizar el acopio de materiales y la organización de los tajos, como pasos previos, hay que contemplar un replanteo generalizado del espacio a revestir. Este replanteo incluirá las siguientes fases:
- Comprobación de todas las medidas del espacio a revestir, replanteo de niveles, aplomado de paramentos, plenitudes, comprobación de huecos y disposición de la trama de juntas de colocación.
- Según la disposición de la trama de juntas y las dimensiones debemos obtener una distribución que persiga los objetivos de: ausencia de tiras estrechas y/o puntas pequeñas (colocación a cartabón), y recurrir al menor número posible de cortes de baldosas.
- Inspección, limpieza y protección de las juntas estructurales preexistentes. Replanteo de las juntas de movimiento y planificación de los trabajos de ejecución de esas juntas.

EN AESTHETIC CLASSIFICATION

Tiles may vary in color, texture, or appearance according to the manufacturer's design for that particular tile series of product line. The following aesthetic class designations have been provided in the Table, so that the manufacturer may communicate the aesthetic characteristics of a particular tile product.

V0- VERY UNIFORM APPEARANCE. Pieces of the same shade value are very uniform and smooth in texture.

V1- UNIFORM APPEARANCE. Differences among pieces from the same production run are minimal.

V2- SLIGHT VARIATION. Clearly distinguishable differences in texture and/or pattern with similar colors.

V3- MODERATE VARIATION. While the colors and/or texture present on a single piece of tile will be indicative of the colors and/or texture to be expected on the other tiles, the amount of colors and/or texture on each piece may vary significantly. It is recommended that the range be viewed before selection.

V4- SUBSTANTIAL VARIATION. Random color and/or texture differences from tile to tile, so that one tile may have totally different color and/or texture from that on other tiles. Thus, the final installation will be unique. It is recommended that the range be viewed before selection.

ES CLASIFICACIÓN ESTÉTICA

Los azulejos pueden variar en color, textura o apariencia según el diseño del fabricante para una serie en particular. La siguiente tabla muestra la clasificación estética para el fabricante pueda comunicar las características de un producto en concreto:

V0- APARIENCIA MUY UNIFORME. Las piezas del mismo valor tonal son muy uniformes y de textura lisa.

V1- APARIENCIA UNIFORME. Las diferencias entre las piezas de la misma producción son mínimas.

V2- VARIACIÓN LIGERA. Las diferencias en textura y/o dibujos con colores son claramente diferenciadas.

V3- VARIACIÓN MODERADA. Mientras que los colores y/o texturas presentes en una sola pieza serán indicativos de los colores y/o texturas en el resto de piezas, la cantidad de colores y/o texturas en cada pieza pueden variar significativamente. Es recomendable que se muestre toda la gama de colores antes de elegir.

V4- VARIACIÓN SUBSTANCIAL. Color aleatorio y/o diferencias en textura de una pieza a otra, hasta el punto que una puede tener un color y/o textura diferentes del resto de piezas. Además, la instalación final será única. Se recomienda que se muestre toda la gama antes de elegir.

FITTING RECOMMENDATIONS
RECOMENDACIONES DE INSTALACIÓN

EN

3. SURFACE PREPARATION.
The surfaces to be tiled must comply with technological parameters that make them compatible with the materials and tiling techniques used.

To correctly fit tiles you must first examine the surface you are going to tile and take the following into account:

- The stability or dimensional variations expected in the base or structural element.
- The compressibility of intermediate layers used as insulation.
- The flatness, cohesion, water absorption, texture, chemical compatibility and condition of the surface the adhesive will stick to.

It is very important to adhere to adequate setting times and to allow enough time for the surfaces to cure so they can properly bear the loads and prevent possible stress and structural movement that could be transmitted to the outer layers.

Depending on the result of your examination of the surfaces, you will have to do different things or add layers to adapt the surface so it is suitable for fitting tiles, such as: floor screeds or concrete jackets, forming a regular surface, load disbursement, decoupling layers, waterproofing, drainage, vapour barrier, etc.

Generally speaking, a surface is considered suitable for fitting using direct bonding with a fine layer of ceramic adhesives when there is a flatness deviation of less than 3 mm over 2 metres. The flatness required must be even stricter for very large tiles.

ES

3.- SOPORTES DE COLOCACIÓN.
Los elementos constructivos que reciben un recubrimiento cerámico deben cumplir unos parámetros tecnológicos que permitan su compatibilidad con los materiales y las técnicas de colocación de las baldosas cerámicas.

Para la correcta colocación, realizaremos un diagnóstico del soporte o superficie teniendo en cuenta:

- La estabilidad o variaciones dimensionales esperadas de la base o elemento estructural.
- La compresibilidad de las capas intermedias como aislamientos.
- La planitud, cohesión, absorción de agua, textura, compatibilidad química y estado de la superficie de colocación que recibirá el material de agarre.

Es muy importante, respetar los tiempos adecuados de fraguado y maduración de los soportes para que puedan soportar correctamente las cargas y evitar posibles tensiones y movimientos estructurales que podrían transmitirse a las capas superiores.

Según el diagnóstico de los soportes, tendremos que realizar diferentes acciones o capas de adecuación para que la superficie final sea apta para la colocación de un revestimiento cerámico tales como: recrecidos (monolíticos o flotantes), regularización, reparto de cargas, desolidarización, impermeabilizaciones, drenaje, barrera de vapor, etc.

En general, se considera que un soporte es apropiado para la colocación por adherencia directa con adhesivos cerámicos en capa fina cuando podemos verificar una deviación de planitud inferior a 3 mm medidos en regla de dos metros. En caso de baldosas con formatos muy grandes, la planitud exigida debe ser más estricta.

EN

4. INSTALLATION AND MOVEMENT JOINTS.
INSTALLATION JOINTS.
A physical separation between adjoining tiles required to offset sizing deviations in ceramic tiles and to absorb stress and disperse vapour from strata beneath. All ceramic tiling must be designed with installation joints suited to the characteristics of the tiles.

MOVEMENT JOINTS.
Movement joints are a fundamental element in ensuring the correct functioning of ceramic systems. The construction management must state whether to use such joints, where, and their design in terms of width and depth in the construction project.

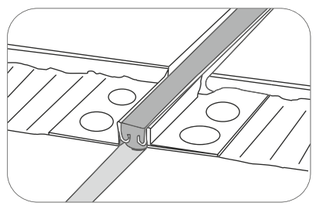
Their main function is to absorb movement and stress from the structure, the surfaces and the tiles, respectively, and help to keep the appearance and functionality of the ceramic system in perfect condition. Although they can be made manually with different compressible sealants, prefabricated movement joints are most commonly used.

STRUCTURAL JOINTS.
These are movement joints in buildings that divide the structure to allow the parts to move. The entire length and breadth of structural joints must be adhered to. All layers in the tiling system should be included. If they are made manually, the sealant should have a minimum permanent deformability rating of 15%.

PERIMETER JOINTS.
These are movement joints that separate the tiles from structural members, the envelope and partitions. They must always be used for paving with a surface area greater than 10m2. They must reach right down to the support base, or, at the very least, the decoupling layer. They must be at least 8 mm wide.

INTERMEDIATE JOINTS.
These are movement joints that are fitted in the ceramic tiling to subdivide it into standardised sections of smaller surface areas to avoid a build-up of stress when the tiles dilate and contract.

For indoor spaces it is advisable to divide the total surface area with intermediate joints in standardised areas of less than 40 m2 for floors and 16 m2 for walls. Divide outdoor paving into areas measuring no more than 16 m2.



ES

4.-JUNTAS DE COLOCACIÓN Y DE MOVIMIENTO.
JUNTAS DE COLOCACIÓN:
Separación física entre baldosas contiguas necesarias para compensar las desviaciones dimensionales que pudieran tener las baldosas cerámicas y para cumplir funciones de absorción de tensiones y de difusión del vapor desde los estratos inferiores. Todo revestimiento cerámico debe ser diseñado con la junta de colocación adecuada a sus características.

JUNTAS DE MOVIMIENTO:
Las juntas de movimiento conforman una parte fundamental para el correcto funcionamiento de los sistemas cerámicos. Su prescripción, ubicación y diseño en cuanto a anchura y profundidad debe estar especificada por la dirección facultativa en el proyecto de obra.

Su función principal consiste en absorber los movimientos y tensiones derivados de la estructura, del soporte y del revestimiento, respectivamente, ayudando a preservar la apariencia y funcionalidad del sistema cerámico en perfecto estado. Aunque se pueden ejecutar manualmente con deferentes materiales sellantes compresibles, generalmente se utilizan juntas de movimiento prefabricadas.

JUNTAS ESTRUCTURALES.
Son juntas de movimiento en las edificaciones que dividen la estructura para permitir el movimiento de sus partes. Se debe respetar las juntas estructurales en toda su longitud y anchura, involucrando a todas las capas que constituyen el sistema de revestimiento. En el caso de ejecución manual, los sellantes deberán tener una deformabilidad permanente mínima del 15%.

JUNTAS PERIMETRALES.
Son juntas de movimiento que separan el revestimiento de los elementos estructurales, cerramientos, particiones. Se deben contemplar siempre en pavimentos con superficie superior a 10m2. Llegarán en profundidad hasta el soporte base o, como mínimo, la capa que actúe como desolidarización. Tendrán una anchura mínima de 8 mm.

JUNTAS INTERMEDIAS.
Son juntas de movimientos que se disponen en el revestimiento cerámico para subdividirlo en áreas regulares de menor superficie para evitar acumulación de tensiones por dilatación y contracciones del revestimiento.

En espacios interiores se aconseja dividir la superficie total con juntas intermedias en áreas regulares inferiores a 40 m2 en pavimentos o 16 m2 en paredes. En pavimentos exteriores dividirá áreas de máximo 16 m2.

FITTING RECOMMENDATIONS
RECOMENDACIONES DE INSTALACIÓN

EN

5. FITTING PROCESS

Ceramic tiles can only be fitted using the technique of thick-bed fixing with traditional mortar when their water absorption capacity is more than 3% and they are less than 900 cm2 in size and are fitted on stable bases without intermediate layers. For other tiles choose ceramic adhesives specifically developed to fit ceramic tiles, as defined in the UNE EN 12004 standard. Take the following instructions into account to correctly fit tiles with ceramic adhesives.

GENERAL REQUIREMENTS:

- Select the right kind of adhesive for the tile's intended use, base, size and water absorption capacity.
- The adhesive layer should be even with uniform thickness and flatness.
- A notched trowel should be used to ensure a homogenous layer. Make sure the adhesive is sufficiently deformable for unstable bases.
- Depending on the texture and absorption/suction, it may be necessary to apply a primer coat to the base.
- The adhesive must be protected from quick drying and damp.
- The surface to be covered must be flat, dry and free of grease, oil or dust and be suitably stable.
- Do not moisten tiles with low water absorption capacity.
- It should be applied when the room temperature and the temperature of the surface and materials is between +5ºC and +30ºC. Do not fit tiles outdoors when it is raining or there is a strong wind.

PREPARING ADHESIVES:

- They should be prepared in accordance with the manufacturer's instructions.
- Suitable tools and clean water should be used.
- Mix the adhesive with a mixer at low speed until you have a lump-free, smooth, creamy and even paste. Let it stand for 5 minutes if the manufacturer says to do so.
- Use it for the duration of its working life and do not mix it again with additional water.
- Only prepare as much product as you are going to use based on the tiling speed and environmental conditions.
- Dispersion adhesives tend to be sold as a paste ready for immediate use.

SINGLE GLUING METHOD:

- The trowel you select depends on factors such as the installation type, flatness of the fitting surface, tile dimensions and the type of adhesive to be used.
- Spread the adhesive over the surface and then comb the right amount on with the specified trowel.
- It is important to make sure you finish the tiling before the adhesive starts to dry to prevent a dry film from forming that could hinder proper bonding.

ES

5.-EL PROCESO DE COLOCACIÓN

La colocación de baldosas cerámicas mediante la técnica de capa gruesa con mortero tradicional de cemento queda restringida a baldosas con capacidad de absorción de agua superior al 3% y con formato inferior a 900cm2 sobre soportes estables sin capas intermedias. Para el resto de baldosas, se seleccionará adhesivos cerámicos desarrollados específicamente para la colocación de revestimientos cerámicos definidos en la norma UNE EN 12004. Para una correcta colocación con adhesivos cerámicos seguiremos las siguientes indicaciones.

REQUISITOS GENERALES:

- Seleccionar el tipo de adhesivo según el destino, soporte, formato y capacidad de absorción de agua de la baldosa.
- La capa del material de agarre será regular con espesor y planitud uniformes.
- Se precisa aplicar con llana dentada para asegurar la homogeneidad de la capa. Soportes inestables, adecuar la deformabilidad del adhesivo.
- En función de la textura y absorción/succión puede ser necesaria una imprimaciones sobre el soporte
- El adhesivo debe ser protegido de un secado rápido y de presencia de humedad.
- La superficie a recubrir debe estar plana, seca, y libre de grasa aceite o polvo y poseer la estabilidad adecuada.
- Las baldosas con baja capacidad de absorción de agua no se deben humectar con agua.
- La aplicación se debe realizar cuando la temperatura ambiente, la temperatura del soporte y la de los materiales se encuentran entre +5 ºC y + 30 ºC, sin vientos fuertes y sin lluvia en colocación de exterior.

PREPARACIÓN DE LOS ADHESIVOS:

- Se preparan siguiendo las indicaciones del fabricante.
- Se utilizaran herramientas adecuadas y agua limpia.
- Se amasa con un batidor a bajas revoluciones hasta la obtención de una pasta homogénea y cremosa y libre de grumos. Se dejara reposar 5 minutos.
- Se utilizara dentro del periodo de vida útil, y no debe mezclarse de nuevo con agua adicional.
- La cantidad de masa elaborada se ajustará al consumo según la velocidad de colocación y las condiciones ambientales.
- Los Adhesivos en dispersión se suelen comercializar en forma de pasta, lista para ser utilizada.

MÉTODO DE SIMPLE ENCOLADO:

- La selección de la llana depende de factores como el tipo de instalación, planitud de la superficie de colocación, dimensiones de la baldosa y tipo de adhesivo a emplear.
- El adhesivo se extiende sobre la superficie de colocación y

EN

- Place the ceramic tile on the adhesive layer with a sliding motion until all the bumps are flattened down to make sure it is uniformly smooth and correctly bonds to the entire surface. You can also apply pressure with a rubber mallet.

DOUBLE GLUING METHOD:

Use double gluing for the following: exterior tiling, tiles larger than N 35x35 cm or equivalent surface areas, interior floors subject to heavy dynamic and static loads, tiling above underfloor heating, using ceramic tile levelling systems, and whenever the project plans expressly specify it. This method improves the moistness of the tiles and makes contact more homogenous throughout the entire surface area on the rear of the tiles to create optimal, long-lasting bonding. Apply it as follows:

- First spread the adhesive over the base surface with a notched trowel. Then spread the adhesive over the rear of the tile with a float or the smooth side of the trowel. The adhesive's final thickness must not exceed the maximum recommended thickness. Fit the ceramic tiles before a dry film forms on the surface of the adhesive.

TILING PROCEDURE:

- Before you start tiling, take several tiles out of different boxes and make sure they are the same shade, grade and size.
- Tiles should be fitted with straight, even joints. The width of the joint depends on the tiles' format, as well as the use and the foreseeable stress to which they will be subjected.
- Never fit tiles without joints between them.
- The use of installation joints less than 1.5 mm wide is not recommended.
- Use joints 1.5 to 3 mm wide when fitting tiles outdoors, on stable bases and floors without underfloor heating underneath or with other mechanical requirements. In other cases, use an open joint 3 to 5 mm wide.
- While the tiles are setting, it is advisable to lift a tile up to check whether the required contact is being made with the surface.
- Remove any excess adhesive from the joints before it hardens to allow for correct grouting. Protect the surface of recently fitted tiles from inclement weather, frost and premature drying. It is also necessary to protect the tiles from being damaged by subsequent work.

FITTING PROCESS:

PROCESO DE COLOCACIÓN:

ES

se peina con llana especificada la cantidad adecuada.
- Es importante controlar que la colocación se realiza dentro del tiempo abierto del adhesivo para evitar que se forme una película seca que perjudica la adherencia.
- La baldosa cerámica se coloca sobre la capa de adhesivo mediante un movimiento de deslizamiento hasta obtener un total aplastamientos de los surcos que garantiza el macizado y la correcta adherencia de toda la superficie. También se puede aplicar presión con maza de goma.

MÉTODO DE DOBLE ENCOLADO:

Se utilizará el doble encolado: en revestimientos exteriores, con baldosas de formato superior a N 35x35 cm o superficie equivalente y en pavimentos interiores sometidos a cargas dinámicas y estáticas importantes, en caso de revestimientos con calefacción radiante, en caso de utilizar sistemas de nivelación de baldosas cerámicas y siempre que el proyecto lo especifique expresamente. Este método mejora la humectación de la baldosa y favorece el contacto homogéneo en la totalidad de la superficie del reverso para generar una adherencia óptima y duradera. Para aplicarlo:

- Por una parte el adhesivo se extiende sobre la superficie de colocación con llana dentada y por la otra, el adhesivo se extiende por el reverso de la baldosa con la paleta o paletín, o lado liso de la llana. El espesor final del adhesivo no debe exceder el espesor máximo recomendado. Las baldosas cerámicas se colocan antes de la formación de una película seca en la superficie del adhesivo.

COLOCACIÓN DE LAS BALDOSAS:

- Antes de proceder a su colocación, es necesario extraer varias piezas de diferentes cajas y verificar la tonalidad, calibre y dimensiones.
- Las baldosas deben colocarse con juntas rectas y regulares entre sí. La anchura de la junta depende del formato de la baldosa y del uso y esfuerzo previsible a la que va a ser sometida la instalación.
- En ningún caso se puede colocar sin junta.
- No se aconseja la utilización de una junta de colocación inferior a 1.5 mm.
- Se utilizará una junta mínima entre 1.5 y 3 mm de anchura en caso de colocación de revestimientos en interior, sobre soportes estables y pavimentos sin calefacción radiante u otras exigencias mecánicas. Para el resto de casos se debe disponer junta abierta entre 3 y 5 mm.
- Dentro del tiempo de ajuste se recomienda levantar alguna baldosa para comprobar si se está consiguiendo la superficie de contacto requerida.
- Se debe eliminar el adhesivo sobrante de las juntas antes de que endurezca para un correcto rejuntado. Debemos proteger el acabado cerámico recién instalado, de las inclemencias del tiempo, heladas y secado prematuro. También es necesario proteger el revestimiento cerámico frente a los posibles daños

FITTING RECOMMENDATIONS
RECOMENDACIONES DE INSTALACIÓN

EN

USE OF LEVELLING SYSTEMS:
There are different levelling system variants specially designed for large-format and thin laminate tiles. These are devices designed to be used during the installation process to help make the end result flatter by exerting pressure on adjacent ceramic tiles. Levelling systems are not meant to rectify insufficiently flat base surfaces or the tiles own dimensional tolerances.

Since they exert force on tiles that are already fitted, certain precautions should be taken into account when using and removing them to prevent them from having a negative effect on bonding with the tiles, as the process is carried out while the ceramic adhesive is still setting.

Follow the levelling system manufacturer's instructions to use it correctly, as well as any instructions the manufacturer may give regarding ceramic adhesives.

6. GROUTING
Grouting is extremely important for the end result of ceramic tiling in terms of both technical aspects and how well it looks. Grouting must be performed using materials specifically developed for that purpose, as defined and classified in the UNE EN 13888 standard.

- Apply grout 24 hours after the ceramic tiles have been fitted.
- Apply grout in accordance with the manufacturer's instructions.
- Class CG2 grout should generally be used.
- In cases that require a high level of mechanical resistance, water-tightness and chemical resistance, use class RG1 grout.
- Spread the grout with a suitable rubber float. Fill in the joints to their full depth with diagonal motions.

ES

que puedan causar los trabajos posteriores.
USO DE SISTEMAS DE NIVELACIÓN:
Existen diferentes variantes de sistemas de nivelación especialmente indicados en caso de baldosas de gran formato y láminas cerámicas de bajo espesor. Son dispositivos desarrollados para su utilización durante el proceso de instalación con el objetivo de favorecer un incremento en la planitud final del revestimiento al ejercer una presión sobre baldosas cerámicas contiguas. Los sistemas de nivelación no están indicados para rectificar la deficiente planitud del soporte o las tolerancias dimensionales propias de la baldosa cerámica.

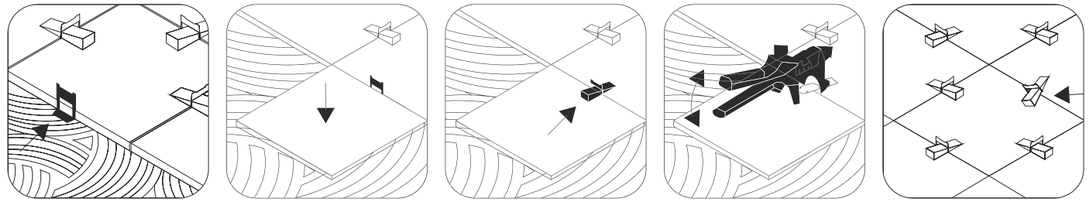
Dado que ejercen una fuerza sobre las baldosas ya instaladas es necesario tener en cuenta algunas precauciones en su aplicación y desinstalación para evitar que puedan afectar negativamente en la adherencia de las baldosas, puesto que el proceso se realiza cuando el adhesivo cerámico está fraguando.

Se debe seguir las instrucciones del fabricante del sistema de nivelación para su correcto uso y las instrucciones que pueda ofrecer al respecto el fabricante de los adhesivos cerámicos.

6.-REJUNTADO
La operación de rejuntado tiene gran importancia para el resultado final del revestimiento cerámico, tanto desde el punto de vista técnico como estético. El rejuntado debe realizarse con materiales desarrollados específicamente para esta finalidad definidos y clasificados en la norma UNE EN 13888.

- El rejuntado se realizará transcurridas al menos 24 horas desde la colocación de las piezas cerámicas.
- La aplicación del material de rejuntado se realizará según las instrucciones del fabricante.
- Generalmente utilizaremos un material de rejuntado tipo CG2.
- Para casos en los que se requiera alta resistencia mecánica, estanqueidad y resistencia química utilizaremos material de rejuntado tipo RG1.
- Se extenderá la pasta de rejuntado utilizando una llana de goma adecuada rellenando las juntas en todas su profundidad con movimientos diagonales.

HITTING RECOMMENDATIONS:
RECOMENDACIONES DE COLOCACIÓN:



EN

7. CLEANING
Final cleaning of the work area is necessary so the tiles are correctly finished. So remove any leftover bits of cement, sealant and any other residue. Use mildly acidic descaling detergents to do this.

It is a good idea to impregnate the surface with clean water before any chemical treatment to prevent the cleaning agents used from being absorbed by the grout.

Do not use these kinds of products on recently installed tiles as the acid will react with adhesives and sealants that have not set yet.

ES

7.-LIMPIEZA
Para un correcto acabado del revestimiento cerámico, es necesario proceder a la limpieza final de la obra. De este modo se retiraran los restos de cemento, materiales de sellado de juntas y cualquier otro residuo. Para ello, se debe utilizar detergentes desincrustantes ligeramente ácidos.

Es conveniente impregnar la superficie con agua limpia previamente a cualquier tratamiento químico para evitar una posible absorción de los agentes utilizados por los materiales de rejuntado.

No deben utilizarse este tipo de productos en las baldosas recién instaladas ya que el ácido reacciona con los materiales de agarre y sellado de juntas no fraguados.

GROUTING AND CLEANING:
REJUNTADO Y LIMPIEZA:

In the case of stains or encrusted dirt, we recommend following the following table to identify the ideal Fila product for every situation.

En los casos de suciedad intensa y/o incrustada, aconsejamos consultar el esquema a continuación para encontrar el producto Fila ideal para cada situación.

KIND OF STAIN OR ENCRUSTED DIRT TIPO DE SUCIEDAD INCRUSTADA	RECOMMENDED FILA PRODUCT PRODUCTO FILA A UTILIZAR
Residues of grouting, calcareous residues marks left by metal objects, rust. Residuos de cemento de colocación, residuos calcáreos, rayas metales, depósitos de óxidos.	DETERDEK
Residues of epoxy grouting. Resíduos de junta resinosa (epoxi, ceramizada, vitrificada, acrílica, etc.)	FILACR10

KIND OF STAIN OR ENCRUSTED DIRT TIPO DE SUCIEDAD INCRUSTADA	RECOMMENDED FILA PRODUCT PRODUCTO FILA A UTILIZAR
Heavy, encrusted organic dirt (grease, drinks, etc.) rubber, marker, drops of plastic paint. Suciedad orgánica intensa e incrustada (comida, grasa, aceites), goma, tintes, rotulador, gotas de pintura plástica.	FILA PS/87
Acrylic, alkyd or nitro-synthetic graffiti. Pintadas de graffiti, spray acrílicos alquímicos y nitro sintéticos.	FILA NOPAINT STAR
